Robotic Process Automation (RPA) technology is transforming medical practices and billing companies alike by replacing highly manual tasks with software solutions.

Let customized software bots do data entry for you, freeing up staff time and improving your cash flow. Implementation is fast and easy, and you'll see an immediate return on investment.

Kareo RPA Products

Automated Clinical Note Creation: Transfer data into Kareo Clinical without a single keystroke.

Automated ERA Processing:* Post ERA payments to each patient account, using customized rules for processing.

Automated Unapplied Payments:* Update your A/R whenever patients make copays, deductibles or payments on account after insurance has adjudicated a claim.

Smart Connector for HL7 & Patient Data: Accept patient demographic, insurance and charge information from different EHRs, automatically populating into Kareo's EHR.

*Great for smaller independent practices

Streamline Your Practice: Free staff from manual data entry for more patient-centered tasks.

Speed Cashflow Cycle: Fewer errors mean fewer rejections from payers, so you get reimbursed faster.

Scale Up Your Business: Expand your practice or billing company using standardized data management.

Proven Results

90% of transactions processed automatically

50% improvement in operational efficiency

30% boost in revenue per clinical encounter

Average customer returns within first 3-6 months of RPA implementation
