kareo | **ROBOTIC PROCESS AUTOMATION**

Robotic Process Automation for Unapplied Payment Posting

Automate Your Unapplied Payment Posting with Rule-Based Processing

Kareo's Unapplied Payments Posting bot uses robotic process automation (RPA) technology to help navigate the complicated and time-consuming task of identifying when patient payments such as copays should be applied.

Key Features

Rules-Based Processing: Establish custom rules based on your unique business needs to ensure accurate posting of patient payments against outstanding responsibility.

Co-Pay Application: Our 'bot' is programmed to match dates of service to each payment received to help keep your accounts receivable up-to-date.

Detailed Reporting: Automatically receive a daily summary of all applied payments, helping you save time and resources.

Key Benefits

Increase Patient Satisfaction:
Keep patients happy and decrease time spent on the phone with accurate billing statements.

Ease Month-End Reconciliation:
Eliminate the need for month-end cleanup with up-to-date accounts receivable.

Improve Operational Efficiency:
Spend far less time on manual data entry, allowing your staff to focus on larger-impact items.
